

PEPTIDE-BASED
with 100%
WHEY PROTEIN

Peptamen® Peptamen JUNIOR®

Peptamen®, Peptamen® with Prebio®, Peptamen® 1.5, Peptamen® 1.5 with Prebio®, Peptamen AF®, Peptamen® Intense VHP, Peptamen Junior®, Peptamen Junior® 1.5, Peptamen Junior® Fiber, Peptamen Junior® HP, Peptamen Junior® PHGG

- Evidence-based, well tolerated nutritionally complete formula that promotes GI tolerance and absorption
- 100% whey protein: High quality protein that supports tissue repair and growth
- Smaller peptides: Higher percentage of di- and tri-peptides that are easy to digest and absorb
- MCTs: Easily absorbed and quickly utilized fat source

Vital® High Protein

EVERYDAY
Tube feeding
for Children

Nutren Junior® and Nutren Junior® Fiber

- Tube feeding for children ages 1-13 years
- Contains 50% whey protein
- **Why Whey Protein:**
 - Whey and casein are the two proteins found in milk
 - Whey protein does not curdle in the stomach and it empties more quickly than casein, so it may decrease the risk of regurgitation and vomiting
