

IMPACT ADVANCED RECOVERY® Drink – Suggested Script

Hello **(Name of Patient or Caregiver)**, how are you today?

Your Doctor has recommended that you take IMPACT Advanced Recovery® Drink before your surgery to help support your recovery.

IMPACT Advanced Recovery® Drink contains a unique blend of nutrients specifically formulated to support your immune system to help:

- Prepare you for major surgery
- Reduce your risk of complications following surgery
- Decrease your stay in the hospital after surgery

IMPACT Advanced Recovery® Drink is supported by multiple research studies and is specifically designed with a unique blend of 3 key nutrients, in amounts that prepare your body for surgery and would be a challenge to get from a normal diet alone:

- **Arginine:** an amino acid that can increase blood flow and help support immune function
- **Omega-3 Fatty Acids** from fish oils to help manage inflammation
- **Dietary Nucleotides** to help rebuild immune cells

Please note: This suggested script is not intended as a substitute for clinical judgment or existing facility protocols. IMPACT Advanced Recovery® Drink is intended to be used under medical supervision.

NOT INDICATED WHEN IMMUNE SUPPRESSION IS DESIRED.
