

## **Martin Rosenthal, MD, FACS**

Martin Rosenthal, M.D., is an assistant professor of surgery, division of Trauma and Acute Care Surgery at the University of Florida (UF) College of Medicine. Dr. Rosenthal earned his medical degree from Mercer University School of Medicine in Savannah, Georgia, and completed a general surgery residency and a fellowship in critical care medicine at UF.

Dr. Rosenthal is board-certified in surgery and surgical critical care. His post-graduate surgical training also includes a nutrition fellowship at Louisville University and Oregon Health and Science University, as well as, an abdominal wall reconstruction course. He has professional interest in nutrition and enterocutaneous fistulas. Recently, Dr. Rosenthal has been building an abdominal wall reconstruction and intestinal failure clinic at UF Health and serves as the chair of the Nutrition Committee at the University of Florida.

Dr. Rosenthal is a member of several professional and medical organizations, including the American Society of Enteral and Parenteral Nutrition, the Society of Critical Care Medicine, and a fellow of the American College of Surgeons. He has written numerous journal articles and textbook chapters and enjoys discussing his research on Persistent Inflammation Immunosuppression Catabolic Syndrome (PICS), and how potential nutritional intervention could help decrease inflammation and promote anabolism.
