

Oral Supplement Selection Guide for Partial and Full Thickness Wounds[¥]

USE UNDER MEDICAL SUPERVISION

IMPACT Advanced Recovery[®] is not indicated when immunosuppression is desired.

These suggested guidelines are based on clinical references relating to the use of L-arginine, protein, calories and antioxidants for the nutritional management of wounds and should not be construed as a substitute for medical advice or existing facility protocols.

[¥]In patients with multiple wounds, the algorithm is directed to the most severe wound. Reassessment needed if 30% of wound closure not achieved in 30 days¹⁰

*Unintended weight loss defined as >3kg (or >6 lbs) in past 3 months
