

FOR MEDICAL PROFESSIONAL USE ONLY

Gerber® Good Start® Extensive HA® Powder Infant Formula

Gram Weights & Displacement Factors for Gerber® Good Start® Extensive HA® Powder Infant Formula

Gram Weights & Displacement Factors

Gerber® Good Start® Powder Formula	Grams powder per scoop	Grams powder per tablespoon	Displacement per scoop, mL	Displacement per gram of powder, mL	Displacement per tablespoon of powder, mL
Extensive HA	4.6	8.2	3.3	0.72	5.98

Values are approximate, based on calculated results. Measuring powder by weight yields the most accurate results. If an exact dilution is not required and powder is measured by volume, powder should be level and unpacked. As with any powdered infant formula product, use with immune compromised infants is not recommended. When such use is necessary, we recommend following the Academy of Nutrition and Dietetics guidelines for safe preparation, storage, and administration.
