Gerber® Good Start® Extensive HA® Powder Infant Formula

Formula Weight, Volume & Calories for Gerber® Good Start® Extensive HA® Powder Infant Formula

Formula Weights, Volumes & Calories

Gerber® Good Start® Powder	Container Size	Grams per Container	Grams per Level Cup†	Grams per Level Scoop	Volume of Prepared Formula per Container (fl oz)	Calories per Container‡
Extensive HA	14.1 oz	400	130	4.6	96	1972

Values are approximate, based on calculated results. Measuring powder by weight yields the most accurate results. If an exact dilution is not required and powder is measured by volume, powder should be level and unpacked. As with any powdered infant formula product, use with immune compromised infants is not recommended. When such use is necessary, we recommend following the Academy of Nutrition and Dietetics guidelines for safe preparation, storage, and administration.

* Trial/sample sizes only. † Calculation: scoops per cup x grams per scoop = grams per cup. ‡ Calculation: total gram weight of container x (kcal per 100 gram/100).
