INTRODUCING NEW

vivonex[®]
PEDIATRIC

ELEMENTAL POWDER

With an Updated Nutritional Profile
& New Packaging

A nutritionally complete, hypoallergenic, amino acid-based powder specifically formulated for the nutritional management of children age 1-13 years with malabsorption and other related medical conditions that result in severely impaired GI function.

- ✔ New & improved nutritional profile
- ✔ Now Hypoallergenic
- ✔ Formulated with free amino acids, the building blocks of protein
- ✔ 70% of fat from MCT to decrease potential for fat malabsorption
- ✔ Meets or exceeds 100% DRIs[§] for protein and 25 key vitamins and minerals in 1250 mL for ages 1-8 years and 1865 mL for ages 9-13 years
- ✔ Lactose-free, gluten-free
- ✔ Can be used as a tube feeding or oral supplement

Recommend
vivonex[®]
PEDIATRIC
where appropriate:

• **Severely Impaired GI Function:**
Severe Short Bowel Syndrome, Malabsorption Syndrome, GI Trauma/Surgery, Crohns Disease, Intestinal Failure

• **Transition from TPN**
• **Burn Injuries**
• **Chylous Ascites and Chylothorax**

This product is only appropriate for use in individuals greater than 1 year old. Powdered formulas such as Vivonex[®] Pediatric are not sterile and should not be fed to children who may have immune problems, unless medically directed and supervised. Not for parenteral use. Vivonex[®] Pediatric Powder is formulated to contain low quantities of fat which, under some circumstances, may be insufficient to meet the essential fatty acid requirements of the patient.

§Dietary Reference Intakes (DRIs) represent the Recommended Dietary Allowance (RDA) value unless unavailable, in which case the Adequate Intake (AI) value was used.

Specially formulated with 70% of fat from medium-chain triglycerides (MCT) to decrease potential for fat malabsorption

Carefully selected carbohydrate sources that are:

- Lactose-free
- Gluten-free
- Easy-to-digest

Vivonex® Pediatric Mixing Instructions

Directions for preparation and use:

Consult your child's doctor about pediatric formula feeding including how much to feed, preparation instructions and the need to sterilize (boil) water and utensils before preparing the formula. Powdered formulas are not sterile and should only be prepared and used as directed by your child's doctor.

Step 1

Pour desired amount of water into clean container. See chart.

Step 2

Add unpacked level scoops of powder according to the amount you would like to prepare. See mixing guide. (Only use enclosed scoop).

Step 3

Cap container; SHAKE WELL. Feed child immediately.

For oral feeding, once feeding begins, use contents within 1 hour or discard. For tube feeding, may be left at room temperature for up to 4 hours. Can be used as a sole source nutrition.

Vivonex® Pediatric Mixing Chart*

CALORIC DENSITY	0.67 kcal/mL	0.73 kcal/mL	Standard Dilution 0.8 kcal/mL	0.87 kcal/mL	0.93 kcal/mL	1 kcal/mL
kcal/fl oz	20	22	24	26	28	30
Water Needed (mL)	225	220	220	215	220	210
Unpacked Level Scoops	8	9	10	11	12	13
Final Volume (mL)	~250	~250	~250	~250	~250	~250
mOsm/kg Water	380	433	482	529	559	622
Calories/1000 mL	640	720	790	860	910	1000
Grams Protein/1000 mL	19	21	23	26	27	30
Gravity Flow Through a 5 Fr. Tube	Yes	Yes	Yes	Yes	Yes	Yes

*Values are based on calculated measurements.

Equation to calculate amount of water to add per serving: (desired calories ÷ desired caloric density in decimal form) - 30 (the powder's displacement) = **water amount**. For example, to make 1 serving (200 calories/250 mL) of standard dilutions: (200 ÷ 0.8) - 30 = **220 mL water**.

Higher or lower calorie formula concentrations should be used only under the direction of a medical professional.

Decisions regarding caloric concentration should be based on medical condition and history. The health care provider is responsible for determining nutritional requirements and monitoring patient tolerance to feedings. As with any powdered formula product, use with immune-compromised children is not recommended. When such use is necessary, we recommended following the Academy of Nutrition and Dietetics guidelines for safe preparation, storage, and administration.
