

## **Todd W. Rice, M.D., M.Sc.**

Dr. Rice is an Associate Professor of Medicine in the Division of Allergy, Pulmonary and Critical Care Medicine at Vanderbilt University. He serves as the director of the Medical ICU and takes care of critically ill patients as an intensivist at Vanderbilt University Medical Center.

As a physician scientist, he conducts clinical research in the ICU, specifically in nutrition in critically ill patients and care of patients with sepsis, ARDS, and acute respiratory failure.

Dr. Rice has over 100 publications, including journal articles, abstracts and book chapters and continues to design and conduct numerous studies in critically ill patients.

Dr. Rice is also an author on the most recent ASPEN / Society of Critical Care Medicine collaboration for the Critical Care Nutrition Guidelines.
